

The imagePROGRAF TZ Series Competitive Advantage

TZ-30000 MFP Z36 model shown

Scan and Print at the Same Time

The imagePROGRAF TZ-30000 MFP Z36 allows you to scan and print documents simultaneously.

Independent operations of the printer and scanner provide the customer the ability to do more at the same time. With some competitive products, your entire workflow will come to a stop when either a printer or scanner issue occurs.

★ **Advantage: Be more productive**

Speed

Print up to 4 D-sized prints/minute▲ and up to 244 D prints/hour.▲▲ Get your first print in as fast as 19 seconds!■

The more prints the machine can produce, the more efficiently your business can run!

★ **Advantage: Saves time**

Z36 Scanner

- Single Sensor Scanning Technology
- Scan a monochrome image at up to 13 ips and copy a color document at up to 6 ips.

Produces better color accuracy and detail capture than scanners with CIS Staggered Array Technology.

★ **Advantage: Fast, accurate scans**

Sub Ink Tank System

Hot Swap ink tanks allow you to change ink on the fly while the printer is printing.

Use virtually all the ink in the tank! The competition currently cannot do this!

★ **Advantage: Saves time and money**

Image Quality

- Pigment-based ink
 - Optimized print head enables accurate dot placement
- Produce sharp lines and text as well as vibrant, colorful posters and banners.

★ **Advantage: Versatile output capabilities**

Software Utilities

Canon has a host of creative software available including Direct Print Plus, Canon Production Printing Driver Select, Canon Production Printing Publisher Select, PosterArtist Lite, and more!

A large breadth of software, from workflow to creative.

★ **Advantage: No need to buy additional software**

True Intelligent Media Handling

- Load the paper and the printer will automatically feed the media.
- The printer will detect media type, width, and length.

Anyone can load paper into the machine! The imagePROGRAF TZ Series is the only printer in this market segment that can do this!

★ **Advantage: Saves time**

Top Output Stacker

Up to 100 ARCH E sheets can be stacked in the Top Output Stacker. For added peace of mind, prints are stacked face-down for extra privacy.

The stacker is positioned lower and closer to the front of the printer for easier document retrieval!

★ **Advantage: Added privacy and convenience**

Smart Roll Set

Load a second roll of media while the device is printing from the first.

Virtually no printer downtime for continuous production printing.

★ **Advantage: Saves time**

Remaining Roll Indicator

Four different media levels displayed so you know when paper needs to be loaded.

Easy to see when paper is running low!

★ **Advantage: Keeps production moving**

Media Options

Print on Bond, coated/uncoated, photo, water-resistant media, and more.

The imagePROGRAF TZ large-format printer has the ability to produce a wide variety of applications.

★ **Advantage: Bring poster-making in-house**

imagePROGRAF
TZ Series

▲ 4 ANSI D prints/minute speed measured after first print in Fast Q5 mode, using plain paper.

▲▲ All speeds measured using plain paper, Fast Q5 mode. The 244 ANSI D prints/hour is measured from when the first print begins printing.

■ Print-ready mode. Plain paper, Fast Q5 mode.
