

## The Fastest imagePROGRAF. Ever.

Up to 4 D Prints/Minute\*
Up to 244 D Prints/Hour\*\*

Integrated 100-Print Capacity Top Stacker

Dual-Roll Intelligent Media-Handling System that Detects Media Type, Width, and Length

## Get the best of both worlds with the new Canon imagePROGRAFTZ Series of large-format printers.

Built with production, efficiency, and versatility in mind, the imagePROGRAF TZ large-format printer is a new hybrid solution! It's uniquely qualified to seize and expand the production aqueous inkjet market with its ability to print black-and-white line drawings and full-color posters on multiple media substrates. The advanced features of the imagePROGRAF TZ large-format printers include:

- **Twin Carriage Motors** for maximum productivity
- Dual-Roll Media System that offers automatic media-switching capabilities for enhanced operation
- **Top Output Stacker** for easy handling of documents from the front of the printer
- LUCIA TD 5-Color Pigment Ink System that produces detailed lines and sharp text

# DOCUMENT MANAGEMENT SOLUTIONS

Printing to your large-format printer shouldn't be a hassle. Streamline your printing workflow with Canon's free available software:

## • DIRECT PRINT PLUS

In as little as one step, simply drag and drop files for on-demand printing. High-speed file processing, batch printing, and the ability to monitor the status of more than one device are just some of the key advantages of Canon's Direct Print Plus software.

## • CPP PUBLISHER SELECT

This job submission software gives you the ability to manage printer status and ink and media levels. You can also receive operator warnings when ink is low or the media roll is empty. Additional functionality includes:

- Dual printer support
- Preset creation for frequently used job settings
- Access to all printing features on one screen

## PRINTER DRIVERS

Choose either the Canon Printer Driver or CPP Driver Select. CPP Driver Select offers you the flexibility to print to imagePROGRAF TZ, PlotWave, and ColorWave models for multiple fleet management.

Print with more confidence knowing Canon's advanced security features and technology are on the job.

## **STORAGE**

The hard drive is self-encrypting with AES 256 technology and multiple levels of file and data erasure. Completely erase all files at the touch of a button.

## **INTERFACE**

Ability to disable:

- USB Direct Thumb Drive
- USB Port
- Ethernet Port

## **COMMUNICATIONS**

IPSec, 802.1x compatible and TLS-enabled/disabled encryption capability.

## **MANAGEMENT**

PIN Printing—Set a numerical passcode in the printer driver and input that same passcode in the control panel of the printer to help ensure that only you have access to your printouts.

For continuous production printing, the imagePROGRAF TZ Series lets you load a second roll of media while the other roll is printing. Additionally, **Hot Swap Ink Tanks** allow you to change ink while printing, without damaging or stopping the print—Virtually no down time!

These are the only printers in the industry that can do this!

## The Intelligent Media Handling

feature allows the user to simply place a roll in the opened drawer and slide in the media from the front of the printer with ease. The printer automatically detects media type, width, and length, for simplified user handling.

The imagePROGRAF TZ ships standard with a **Dual Roll** for maximum productivity. Load up to two (2) rolls of 36" paper or mixand-match paper types and sizes.

The **MFP System Controller** has an all-new intuitive GUI design for simplified printer management. Complete with a new processor, scanner functionality has never been easier and faster in an imagePROGRAF MFP.

 Equipped with the new, lightweight Z36 Scanner, you can scan monochrome drawings at up to 13"/second and color drawings at up to 6"/second.

4.3" **Touchscreen Control Panel** for quick and simple access to printer controls.

**Integrated MFP design** for easy office placement.

## The Roll Paper Indicator

takes the guesswork out of determining how much paper is left in the printer. The LED lights display four (4) different media levels, letting you know when paper is running low.

- \* 14 seconds for an ANSI D print and 4 ANSI D prints/minute speed measured after first print in Fast Q5 mode, using plain paper
- \*\* All speeds measured using plain paper, Fast Q5 mode. The 244 ANSI D prints/hour is measured from when the first print begins printing.
